Experienced Software Engineer with 4+ years' expertise in HTML, CSS, JavaScript, React (including React Native and Next JS), TypeScript, Angular, and Node.js. Proficient in both independent and collaborative Front-End development projects.

## Work Experience

### Vexels - Mid Frontend Developer

March 2023 - present

Uruguay, Montevideo - Remote

- Create a React component library with Storybook to streamline UI development, enhance code reusability, and facilitate team collaboration.
- Worked on 4 company apps utilizing Next.js and TypeScript to significantly boost annual client revenue.
- Elevated company revenue by 15% through the implementation of AI in design generation.

### Onetree - Tech Implementation Analyst

June 2022 - March 2023

Uruguay, Montevideo - Remote

- Fix JavaScript client-side script bugs for improved user experience and overall system functionality.
- Create Node JS web services with SQL to meet user demands and optimize functionality.

### Garaje de Ideas - Junior Software Developer

June 2020 - June 2022

Madrid, España | Bs.As, Argentina

- Developed UI and services for Supervielle Seguros utilizing Angular and Node.js with a Test-Driven Development (TDD) approach.
- Achieved 28% conversion growth in Santander's Home Banking with JavaScript-based CRO, employing A/B testing.

## Technical Projects

### Doggo App

[www.doggoapp.com.ar](http://www.doggoapp.com.ar)

- Built a React JS landing page and crafted a React Native app, utilizing Redux and integrating with Firebase.
- Led a compact team using SCRUM to achieve specific objectives within set timelines.

### MDC Components Library

[github.com/ezeagusibarra001/mdc-ui](https://github.com/ezeagusibarra001/mdc-ui)

- Create a React component library from scratch for my start-up using Storybook, ensuring streamlined development and enhanced collaboration across the team.
